Strengthen Security Operations with Intelligent Video Monitoring Tools

10:30 A.M. - 10:55 A.M.

HUNT ROOM (MEZZANINE)

SPEAKER:
PAUL WASSEM, OPENEYE

OpenEye's intelligent video monitoring tools provide a powerful set of hardware and software features that enhance business monitoring, enabling you to provide a more dynamic and complete security solution to your customers. This workshop explores the main benefits of OpenEye's next-generation monitoring tools, how it enables upsell opportunities, improves processes, and enhances workflow by reducing false alarms and streamlining active monitoring.

Video Monitoring Ground Up: Strategy and Implementation

10:30 A.M. - 11:25 A.M.

SPEAKERS: TATIANA ABRAHEK AND
NICOLA OAKIE, NMC (NATIONAL
MONITORING CENTER)

The subscriber's needs should be the biggest driver of what video service level you provide, not the budget. However, your company goals matter and what services you are willing to become the leader for within your market. Where do you start? There are so many levels of video services, pricing strategies and environments. In this class structure, we aim to break it down once and for all so that you can decide how to make the best decisions to move forward with your video services offerings. Nuts to Bolts.

INTERVIEW RYAN LEE, FOUNDER AND
CEO, TRIDENT ADVISORS

AI Reality Check: Cutting Through the Noise for the Security Industry.

AI is dominating headlines, but how much of the hype truly applies to security companies and monitoring centers? In this interactive Executive Symposium session, moderator George De Marco, Managing Partner for DECO Ventures LLC, sits down with Ryan J. Lee, Founder and CEO of Trident Advisors and former ADT Program Manager of Integrated Services & Solutions, for a candid exploration of what AI means—and doesn't mean—for today's industry leaders.

Ryan will guide attendees through real-world scenarios, emerging trends, and common misconceptions, helping executives understand where AI genuinely creates value and where expectations can easily become misaligned. This interactive session is designed to spark thoughtful dialogue, challenge assumptions, and provide strategic clarity for leaders navigating AI adoption.

Attendees will leave with a grounded, practical perspective on how AI can enhance operations, support teams, and improve customer outcomes—without the noise, confusion, or overpromising often seen in the market.

Smarter Security, Safer Spaces: How AI Detects, Deterrents, and Delivers Unrivaled Customer Experience

2:00 P.M. - 2:25 P.M.

INTERNATIONAL ROOM (MEZZANINE)

SPEAKER: JAMES RENO, ALARM.COM

In today's intelligent property, video AI is doing more than just capturing footage, it's transforming how we secure and manage spaces.

By understanding the state of the security system, access control activity, and behavioral patterns unique to each site, AI can accurately distinguish between routine activity and real threats. This contextual awareness dramatically reduces false alarms, improves response accuracy, and strengthens deterrence before incidents occur.

Beyond safety, these insights create a seamless and reassuring customer experience, residents, employees, and visitors feel protected without disruption. The result is a smarter, safer, and more proactive environment where AI not only sees what's happening but understands what it means.
