## ADVERTISING SPECIFICATIONS

**AD POSITION:** All advertisements are R.O.P. Preferred positions are assigned based on space availability, ad size and frequency.

### AD SIZES:

**Full page:** 11" high x 8-½" wide (trimmed size) *If you require bleed, YOU MUST include 1/8" on each bleed edge (add this to the trim size for overall size of 11-¼" high x 8-¾" wide).*

**Half page horizontal:** maximum 5" high X 7-½" wide

**Half page vertical:** maximum 10" high X 3-5/8" wide

**Quarter page:** maximum 5" high X 3-5/8" wide

**Business card:** 2" high x 3-½" wide.

Vertical cards also accepted: 3-½" high x 2" wide

**AD COLOR:** full color accepted. All color must be cmk. Do not send rgb color - we convert all color to cmk with no adjustments. *For color management, our color profile is US Sheefed coated V2. Otherwise, turn off color management.*

### AD SPECIFICATIONS:

1. *We accept EPS files or flattened TIF files* at 300 pixels per inch. We accept eps files up to version CS6. If you convert your eps files to high resolution tif files, they will be easier to transmit and handle. For EPS files - convert ALL fonts to curves.

*All files will ultimately be converted to tif files for use in production.*

2. *We accept PDF:* EMBED ALL FONTS or first convert them to curves in your layout. Set pdf settings to "Press" or high resolution - 2400 line or higher, or 300 pixels. There are many ways to set up a pdf file. Please use pdf files only if you know how to create a high resolution "Press" level pdf file and make sure that all elements inside of the file are high resolution. You can use the PDF/X-1a:2001 output setting where available.

**PDF and CROP MARKS** - vital info if your ad bleeds off the edges.

1. **For full page ads:** do not use crop marks unless you can set them up to be visible in the opened pdf file. If you open your pdf in the Acrobat Reader and you do not see your crop marks, then we can't either and your bleed has disappeared.

1. **For fractional ads sizes (smaller than a full page):** Fractional ads ordinarily do not require bleed. If you include bleed in a fractional ad, you must provide crop marks and they must show up in the Acrobat Reader or else we cannot see them, and we will not know where you intend to crop, and the entire image will be reduced to spec size. It is best if you send fractional ad files cropped as desired.

### FONTS - very important for all files

- **For PDF files, embed ALL fonts, or convert to curves before you make the pdf file.**
- **For EPS files, convert all fonts to outlines.**
- **For TIF files, rasterize fonts (in Photoshop). Do NOT send type in layers. Flattening layers will rasterize fonts.**
- **Convert PSD files to flattened TIF files.**

### OTHER INFORMATION

*Application files are NOT accepted. Do NOT send Quark, InDesign, Corel, Word, Publisher, Excel or Powerpoint. Do not send layered PSD files. If you need help, call the publishing office well before the ad deadline so that we can assist you.*

**If you zip up your files, use Zip or Winzip - do not use Aladdin or Stuffit.**

**Send your files by email or other independent digital sending service to:**

(Disks can be mailed to the publishing office.)

### PUBLICITY MATERIALS

*Tifs and jpg files should open at 133 to 150 line (266 pixels to 300 pixels per inch) at minimum 2 X 3" approx. Do NOT send graphics from the internet - these are too small to be used. Please call the publishing office with questions.*
